

Benjamin Kim

Senior Product Designer • Product Strategy • UX Research

Product designer with experience building and evolving complex products from 0→1 across **healthcare, insurance, and financial services.**

Translating ambiguous problems into intuitive systems that improve customer and business outcomes.

Experience

Soventure & InsureMyTrip / Travel Insurance Aggregator

Aug 2022–Aug 2026

Senior UX Designer (Product Design)

- Led product design across the travel-insurance marketplace, from discovery and quoting through comparison and purchase.
- Used customer research, GA4 funnel analysis and experimentation to improve conversion relative to industry benchmarks and reduce purchase friction.
- Increased repeat customer purchases and reduced the time customers needed on site before purchasing by making coverage and plan comparisons easier to understand.

FirstThought / Healthcare & Life Sciences Expert Network

Jul 2019–Feb 2022

Co-founder / Product Design & Manager

- Designed the core research-management platform around a machine-learning sourcing engine, reducing research workflows from several days to a few hours for a 25-person analyst team.
- Built the roadmap around automating repetitive researcher work: CRM, sourcing/contact enrichment, email workflows through Microsoft Power Automate, and Twilio-powered SMS outreach.
- Introduced SMS outreach that contributed to approximately 1.5x higher response rates; designed screening workflows used to vet 7,500+ expert candidates annually while supporting compliance.
- Owned product strategy, research, UX/UI, prototyping, implementation and iteration, plus the company's public website and engagement analytics.

Cureatr / Medication Management Technology & Services

Feb 2016–May 2019

Senior UX Designer

- Designed and prototyped medication-reconciliation workflows for physicians and pharmacists, including clinical timelines and tools to surface medication gaps and potential overdose risk.
- Created an internal staff messaging product; the platform was used across 20+ hospitals nationwide.

Quality Reviews / Real-Time Patient Feedback

Apr 2014–Dec 2015

Founding Employee, Head of Product Design, Product Consultant 2021–2024

- Joined as the first employee; designed the patient-facing survey tool and provider analytics dashboard for real-time patient feedback.
- Helped recruit the first CTO/developer, supported fundraising and early product strategy, and traveled to hospitals to demo the product and support sales. Helped scale the product to 21M patients and 10 of the top 35 U.S. healthcare providers.

Axial / M&A & Capital-Raising Marketplace

Nov 2011–Apr 2014

Lead Product Designer / Product Development

- Led UX and visual design for a marketplace supporting middle-market capital raising and M&A workflows.
- Managed collaboration between design and front-end engineering across a combined five-person team.

Gerson Lehrman Group / Expert Network & Information Services

Feb 2008–Nov 2011

Senior UX/UI Designer

- Designed core web products for expert-research workflows and used performance metrics to inform iterative product improvements.
- Managed and mentored two junior designers.
